## AIRFLOWS

### AIRFLOW LEGEND

|                                                                 |                              |                       |
|-----------------------------------------------------------------|------------------------------|-----------------------|
| Inlet                                                           | HPT, BAI, eductor            | Forward plug cavity   |
| Fan discharge                                                   | Fan compartment ventilation  | 4th stage bleed       |
| Core flow                                                       | Inlet and reverse            | Sump vent             |
| Compressor discharge                                            | Core compartment ventilation | Combustion gas        |
| Booster discharge for bore cooling, sump pressurization and VBW | Fan mid-shaft air cavity     | AFT LPT rotor cooling |
